

SUESD Goals of Distance Learning:

Through Distance Learning it is our goal to provide all students and families the access and opportunity to continue a strong and caring school and home community connection, while also providing a pathway for all students to access lessons and interactive delivery platforms through which previously learned skills can be reviewed, as well as creating opportunities for students to be introduced to, and experience, new learning.

Hopes, Expectations and Distance Learning Roles

During this new and unprecedented time in the world, our expectations and hopes for our families and staff are these:

- *You will all take the opportunity to love and care for yourself and your family.*
- *Our staff will reimagine their personal and professional "normal" in new and creative ways.*
- *Our staff will provide students and families lessons through which previously learned skills will be reviewed, and access to new learning has an open door.*
- *Our staff will engage in vertical collaboration in preparation for students' entry into the next grade level.*
- *You will all continue to be a thoughtful advocate for your students' academic, social and emotional well-being.*
